

# Picking - System KOM 01

**Commissioning of newspapers and  
magazines, or  
Filling of cartons and boxes with max.  
32 different products.**

The picking – system KOM 01 facilitates the bringing together of packages. The packing slip will be read with a 2D code and displays the required number on the display. Misreading of delivery notes is prevented. The display will turn green if the product has to package and red when this item is not in required. Mistakes are minimized.

- Up to 32 different products
- No complicated software or database
- Retrofitting of existing shelving possible
- Expandable with feeder for automatically dispensing the packing slip in the strapping machine
- Expandable with weighing system for weight control
